Authorization for this examiner's amendment was given in a telephone interview with Kader Gacem on 1/7/05.

- (b) Claim 16, last line, after "medium" the following has been added --; wherein the width in the track width direction of the gap layer is less than 0.4  $\mu\text{m}$  when viewed from the surface facing the medium--.
- (c) Claim 1, line 12 the word "minimum" has been deleted.

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance. The claims now specifically set forth a thin-film magnetic head with at least a Gd-defining layer, gap layer, lower core layer, an upper pole layer, and an upper core layer such that a width in a track width direction of the gap layer is smaller than a width in the track width direction of the upper pole layer when viewed from the surface facing the recording medium and the this width of the gap layer is less than 0.4  $\mu\text{m}$ . This dimension is considered critical and unobvious, as discussed in
